French Foreign Legion 1831-71 Martin Windrow,2016-12-15 Concluding his bestselling series on the French Foreign Legion, Martin Windrow explores the formation and development of the Legion during its 'first generation'. Raised in 1831, the Legion's formative years would see it fight continuous and savage campaigns in Algeria, aid the Spanish government in the Carlist War, join the British in the Crimean campaign and fight alongside the Swiss in the bloody battles of Magenta and Solferino. With the ever-changing combat environments they found themselves in, the Legion had to constantly adapt in order to survive. Taking advantage of the latest research, this lavishly illustrated study explores the evolution of the uniforms and kit of the French Foreign Legion, from their early campaigns in Algeria through to their iconic Battle of Camerone in Mexico and their role in the Franco-Prussian war.

The Bull Ring Uncovered Catharine Patrick,Stephanie Ratkai,2008-12-12 The excavations in the centre of Birmingham uncovered evidence of habitation from prehistoric and Roman times, but the 12th to 19th centuries presented by far the most

evidence, from artefacts, environmental samples and structural remains. The medieval industrial past was of particular interest, with tanning and the manufacture of hemp and linen all playing a large role in the city's prosperity. Metal working reached its peak in the seventeenth century, with brass founding becoming important from the eighteenth century onwards. Most of the artefactual evidence attests to Birmingham's industrial past, indeed the evidence for domestic life is comparatively scant, with an anomalous burial of two people at Park Street presenting something of a mystery. This volume presents insights into the early industrial past of this important city and is an invaluable record covering eight hundred years of occupation.

Ehlers-Danlos Syndrome: A Multidisciplinary Approach J.W.G. Jacobs,L.J.M. Cornelissens,M.C. Veenhuizen,2018-08-14 Generalized hypermobility has been known since ancient times, and a clinical description of Ehlers-Danlos syndrome (EDS) is said to have first been recorded by Hippocrates in 400 BC. Hypermobility syndromes occur frequently, but the wide spectrum of possible symptoms, coupled with a relative lack of awareness and recognition, are the reason that they are frequently not recognized, or remain undiagnosed. This book is an international, multidisciplinary guide to hypermobility syndromes, and EDS in particular. It aims to create better awareness of hypermobility syndromes among health professionals, including medical specialists, and to be a guide to the management of such syndromes for patients and practitioners. It is intended for use in daily clinical practice rather than as a reference book for research or the latest developments, and has been written to be understandable for any healthcare worker or educated patient without compromise to the scientific content. The book is organized as follows: chapters on classifications and genetics are followed by chapters on individual types, organ (system) manifestations and complications, and finally ethics and therapeutic strategies, with an appendix on surgery and the

precautions which should attend it. A special effort has been made to take account of the perspective of the patient; two of the editors have EDS. The book will be of interest to patients with hypermobility syndromes and their families, as well as to all those healthcare practitioners who may encounter such syndromes in the course of their work.

Desert Warfare: German Experiences In World War II [Illustrated Edition] Major General Alfred Toppe,2014-08-15 Includes 112 photos/illustrations and 21 maps. The German Afrika Korps blazed a trail across the deserts of North Africa under their dashing leader Erwin Rommel, the Desert Fox, although finally defeated by far superior Allied

Forces they set the gold standard for desert operations. This book is of great historical value and even in the present day it is still considered of great value by the American military who still seek for improvements in their ways of desert doctrine... "Analysts continue to assess the data from Operations Desert Shield and Desert Storm as a means of improving the military's ability to function efficiently in desert terrain...The information gleaned from this effort will enhance the already considerable body of knowledge on the subject derived from the historical record...When contributions in the latter category are located or rediscovered, they should be given the dissemination they merit... "Such is the purpose of publishing Desert Warfare: German Experiences in World War II...Organized by Major General Alfred Toppe and written with the assistance of nine German commanders who served in North Africa, the manuscript...represents a collaborative attempt to determine "as many factors as possible which exerted a determining influence on desert warfare," Issues addressed include planning, intelligence, logistics, and operations. Described and analyzed are the German order of battle, the major military engagements in North Africa, and the particular problems of terrain and climate in desert operations. Not unlike many of the U.S. units engaged in the war with Iraq, the Germans in North Africa learned about combat operations in the desert only after they arrived on the scene and confronted the desert on its own terms. For this reason alone, as well as for the insights it offers, Desert Warfare requires the serious consideration of those responsible for preparing the U.S. military for any future conflict in desert terrain."
