*French Foreign Legion 1831-71* Martin Windrow,2016-12-15 Concluding his bestselling series on the French Foreign Legion, Martin Windrow explores the formation and development of the Legion during its 'first generation'. Raised in 1831, the Legion's formative years would see it fight continuous and savage campaigns in Algeria, aid the Spanish government in the Carlist War, join the British in the Crimean campaign and fight alongside the Swiss in the bloody battles of Magenta and Solferino. With the ever-changing combat environments they found themselves in, the Legion had to constantly adapt in order to survive. Taking advantage of the latest research, this lavishly illustrated study explores the evolution of the uniforms and kit of the French Foreign Legion, from their early campaigns in Algeria through to their iconic Battle of Camerone in

Mexico and their role in the Franco-Prussian war.

Vetiver Grass National Research Council, Policy and Global Affairs, Board on Science and Technology for International Development, Panel on Vetiver, 1993-02-01 For developing nations, soil erosion is among the most chronic environmental and economic burdens. Vast amounts of topsoil are washed or blown away from arable land only to accumulate in rivers, reservoirs, harbors, and estuaries, thereby creating a double disaster: a vital resource disappears from where it is desperately needed and is deposited where it is equally unwanted. Despite much rhetoric and effort, little has been done to overcome this problem. Vetiver, a little-known tropical grass, offers one practical and inexpensive way to control erosion on a huge scale in both humid and semi-arid regions. Hedges of this deeply rooted species catch and hold back sediments while the stiff foliage acts as a filter that also slows runoff and keeps moisture on site. This book assesses vetiver's promise and limitations and identifies places where this grass can be deployed without undue environmental risk.
