A Guide to the Birds of Colombia Steven L. Hilty,William L. Brown,1986 Describing all of Colombia's birds, Steven Hilty and William Brown bring together information on one of the world's largest avifaunas-nearly 1,700 species. Over half of all the species of birds in South America are included, thus making the book useful in regions adjacent to Colombia, as well as in the country itself. The primary purpose of the work is to enable observers to identify the birds of the region, but it also provides detailed species accounts and will serve as an important handbook and reference volume. Fifty-six lavish color plates, thirteen halftone plates, and ninety-nine line drawings in the text illustrate over 85% of the species, including most of the resident birds. Notes on the facing-page of each place, and range maps of 1,475 species, facilitate identification. Written with the field observer in mind, the text gives special attention to comparisons of similar species, transcriptions of voices, and comments on behavior, status, and habitat. It also provides ranges, breeding data, and references. Notes outline taxonomic problems and briefly describe species that eventually may be found in Colombia. Introductory chapters and photographs highlight Colombia's geography, climate, and vegetation, and discuss migration and conservation questions, and the history of Colombian ornithology. Appendices contain a large bibliography, a section on birding locations, and coverage of two of Colombia's far-flung island territories, Isla San Andr s and Providencia. Maps depicting vegetation zones, political boundaries, national parks, and the most text localities are included.

Hitler's Blitzkrieg Enemies 1940 Nigel Thomas,2014-02-20 The armies of Denmark, Norway, the Netherlands and Belgium bore the first crushing impact of Hitler's mighty Blitzkrieg war machine in Western Europe, in a campaign that astonished and terrified the world. The German Wehrmacht was millions strong, equipped with the latest guns, tanks and aircraft, and had the priceless advantage of having learned the realities of modern warfare in Poland the previous September. The defenders of Scandinavia and the Low Countries were raised from small populations, and were inadequately funded, trained, equipped and armed. Their modest numbers, inexperience, and largely indefensible borders condemned them to rapid defeat. For this reason they have tended to be neglected by history - in many cases, unjustly. Vastly outnumbered - and, in the case of the neutral Low Countries, with their potential French and British allies reeling under simultaneous attacks - thousands of soldiers fought heroically in the hopeless defence of their homelands against the Nazi juggernaut.

Finds from Roman Aldborough M. C. Bishop,1996 The assemblage of finds from Roman Aldborough is one of considerable importance, yet it is almost invisible because the site museum is only open in the summer months and has very limited display space. The publication of this catalogue is therefore essential to make the large body of material more widely available. This catalogue concentrates on the small finds, including a wealth of domestic items, jewellery, tools and a collection of military equipment of particular significance for the history of the site. Almost all of the items are illustrated, with full descriptions, and references where applicable. A book which brings a rich collection into public view making it available for assimilation and reassessment.
