**Tropical Agroforestry** Alain Atangana,Damase Khasa,Scott Chang,Ann Degrande,2013-10-29 Agroforestry is recognized as a sustainable land-use management in the tropics, as it provides environmental-friendly ecosystems; it also provides people with their every day need for food and cash. Since the recognition of agroforestry as a science, curricula have been developed for agroforestry programs for undergraduate and graduate trainings in Universities. Therefore, there is an urgent need to develop and make available educational material. This textbook strives to provide up-to-date information on tropical agroforestry to serve as educational material in the tropical context. The authoritative textbook of Nair (1993) on agroforestry was published 18 years ago, and before the advent of tree domestication, an important agroforestry practice today. In addition, many other research activities, such as carbon sequestration and integrated pest management, have been included in the agroforestry agenda. This textbook is intended for agroforestry students, teachers, and practitioners.

**Rise and Fight Again** Spencer Tucker,2023-09-19 Next only to Continental army commander General George Washington, Nathanael Greene was the most important American general of the War for Independence. Self-taught but extraordinarily capable, Greene won few battles. But his campaign that won the South for the revolutionary cause was the most brilliant and daring of the entire war. In *Rise and Fight Again*, award-winning military historian Spencer Tucker tells the story of Greene's rise from relative obscurity to military prominence at the tender age of thirty-two. He reveals Greene to have been a strict disciplinarian who insisted on rigorous training but was also deeply concerned for the welfare of his men. Tucker also shows that Greene was by nature a problem-solver who recognized talent and knew how to harness it effectively. Indeed, although Greene was the youngest general in his army, Washington assigned him the herculean task of serving as its quartermaster general. Greene proved so effective in this demanding assignment that in October 1780 he was given command of the Southern Department. Taking charge of a sharply depleted, dispirited force lacking all manner of military equipment and even clothing, Greene refused to be drawn into pitched battles save on favorable terms. He rebuilt the Southern army in less than a year and adopted daring tactics that defied conventional military wisdom but recaptured from British control most of the Carolinas and Georgia. Greene has rarely been accorded his earned place in the history of the American founding, in part because of his early death in 1786, when he was just forty-three. But with Tucker's brief but masterful biography, Greene finally gets his due.

**Anti-Corruption and its Discontents** Grant W. Walton, 2017-08-03 The fight against corruption is now a core part of development policy and practice. Some call these efforts a 'war on corruption'. What does this so-called 'war' mean for developing countries? And how do international perspectives on corruption relate to local and national concerns? This book examines the relevance of anti-corruption discourse in Papua New Guinea (PNG), one of the most culturally rich and 'corrupt' countries on earth. Despite increased international, national and local efforts to address corruption over the past two decades, many fear that levels of corruption continue to rise largely unabated. Some believe that the mismatch between international, national and local assumptions regarding the nature of corruption and how it should be addressed is at the heart of the issue. International anti-corruption initiatives stress 'zero-tolerance' and try to strengthen formal state-based institutions. However, many people in PNG are more concerned about maintaining social relationships than following state laws and rules. This book critically examines the implications of the anti-corruption agenda and the collision of international, national and local perspectives. In doing so it provides a diagnostic on international assumptions about corruption and how it should be fought in developing countries, offering surprising and important lessons. This book is essential reading for

scholars and students of Development Studies, Geography, Political Studies and Economics, as well as practitioners and policy makers working in development.

Ultrafast Strong Field Dynamics in Dielectrics Annkatrin Madlen Sommer,2016-07-20 This thesis presents a systematic discussion of experimental approaches to investigating the nonlinear interaction of ultrashort visible strong fields with dielectrics directly in the time domain. The key finding is the distinctly different peak-intensity dependence of the light-matter energy transfer dynamics on the one hand, and the observed transient optical and electronic modifications on the other. As the induced electron dynamics evolve on sub-femtosecond timescales, real-time spectroscopy requires attosecond temporal resolution. This allows a range of parameters to be identified where the optical properties of the samples exposed to ultrashort light fields suffer dramatic changes allowing signal metrology while real absorption leading to dissipation is essentially absent. These findings indicate the feasibility of efficient optical switching at frequencies several orders of magnitude faster than current state-of-the-art electronics and thus have far-reaching technological consequences.

**Advanced Computing, Networking and Informatics- Volume 1** Malay Kumar Kundu,Durga Prasad Mohapatra,Amit Konar,Aruna Chakraborty,2014-05-26 Advanced Computing, Networking and Informatics are three distinct and mutually exclusive disciplines of knowledge with no apparent sharing/overlap among them. However, their convergence is observed in many real world applications, including cyber-security, internet banking, healthcare, sensor networks, cognitive radio, pervasive computing amidst many others. This two-volume proceedings explore the combined use of Advanced Computing and Informatics in the next generation wireless networks and security, signal and image processing, ontology and human-computer interfaces (HCI). The two volumes together include 148 scholarly papers, which have been accepted for presentation from over 640 submissions in the second International Conference on Advanced Computing, Networking and Informatics, 2014, held in Kolkata, India during June 24-26, 2014. The first volume includes innovative computing techniques and relevant research results in informatics with selective applications in pattern recognition, signal/image processing and HCI. The second volume on the other hand demonstrates the possible scope of the computing techniques and informatics in wireless communications, networking and security.

*Web Design in a Nutshell* Jennifer Niederst Robbins,2006-02-21 Are you still designing web sites like it's 1999? If so, you're in for a surprise. Since the last edition of this book appeared five years ago, there has been a major climate change with regard to web standards. Designers are no longer using (X)HTML as a design tool, but as a means of defining the meaning and structure of content. Cascading Style Sheets are no longer just something interesting to tinker with, but rather a reliable method for handling all matters of presentation, from fonts and colors to the layout of the entire page. In fact, following the standards is now a mandate of professional web design. Our popular reference, *Web Design in a Nutshell*, is one of the first books to capture this new web landscape with an edition that's been completely rewritten and expanded to reflect the state of the art. In addition to being an authoritative reference for (X)HTML and Cascading Style Sheets, this book also provides an overview of the unique requirements of designing for the Web and gets to the nitty-gritty of JavaScript and DOM Scripting, web graphics optimization, and multimedia production. It is an indispensable tool for web designers and developers of all levels. The third edition covers these contemporary web design topics: Structural layer: HTML 4.01 and XHTML 1.0 (9 chapters), including an alphabetical reference of all elements, attributes and character entities Presentation layer: Ten all-new chapters on Cascading Style Sheets, Level 2.1, including an alphabetical reference of all properties and values. Behavior layer: JavaScript and scripting with the Document Object Model (DOM) Web environment: New web

standards, browsers, display devices, accessibility, and internationalization Web graphics optimization: Producing lean and mean GIF, JPEG, PNG, and animated GIFs Multimedia: Web audio, video, Flash, and PDF Organized so that readers can find answers quickly, Web Design in a Nutshell, Third Edition helps experienced designers come up to speed quickly on standards-based web design, and serves as a quick reference for those already familiar with the new standards and technology. There are many books for web designers, but none that address such a wide variety of topics. Find out why nearly half a million buyers have made this the most popular web design book available.
