The Birth of Modern America, 1914 - 1945 John McClymer, 2021-04-26 Provides a look at the origins of the culture wars of modern America and the political and economic transformation of the U.S. republic This book tells, in clear and lively prose, how Americans struggled with modernity in both its cultural and economic forms between the start of World War I and the end of World War II, focusing on the 1920s through 1930s. This edition includes revisions that expand the scope and features increased coverage of topics that will be of great interest to new readers as well as those familiar with the subject. The Birth of Modern America, 1914-1945, Second Edition begins with a discussion of the promises and perils of the progressive era. The book goes on to look at the Great War and life on the home front and explores many paradoxes that marked the birth of Modern America. Topics covered include: the pervasive racism and nativism during and after WWI; the disillusionment with Woodrow Wilson's rhetorical idealism; the emergence of national media; the Great Depression; FDR and the New Deal; the attack on Pearl Harbor; Hollywood's part during World War II; the United States' decision to drop the bomb on Japan; and more. Fang, Dominik Ślęzak, 2010-11-26 Welcome to the Proceedings of the 2010 International Conference on Advanced Software Engineering and Its Applications (ASEA 2010) - one of the partnering events of the Second International Mega-Conference on Future Generation Information Technology (FGIT 2010). ASEA brings together researchers from academia and industry as well as practitioners to share ideas, problems and solutions relating to the multifaceted aspects of software engineering, including its links to computational sciences, mathematics and information technology. In total, 1,630 papers were submitted to FGIT 2010 from 30 countries, which includes 175 papers submitted to ASEA 2010. The submitted papers went through a rigorous reviewing process: 395 of the 1,630 papers were accepted for FGIT 2010, while 40 papers were accepted for ASEA 2010. Of the 640 papers were selected for the special FGIT 2010 volume published by Springer in the LNCS series. 32 papers are published in this volume, and 2 papers were withdrawn due to technical reasons. We would like to acknowledge the great effort of the ASEA 2010 International Advisory Board and members of the International Program Committee, as well as all the organizations and individuals who supported the idea of publishing this volume of proceedings, including SERSC and Springer. Also, the success of the conference would not have been possible without the huge support from our sponsors and the work of the Chairs and Organizing Committee.
