Beta Test Eric Griffith, 2011-12 PUBLISHERS WEEKLY: An unusually lighthearted apocalyptic tale. Sam Terra is having a bad week. He lost Molly, the woman he secretly loves, when she vanished before his eyes at the exact same time that ten percent of the inhabitants of Earth disappeared. Naturally upset, Sam follows clues about the global vanishing with questionable help from his friends including a misanthropic co-worker and a childhood pal. When Molly reappears in the body of a man during a night of monster-laden devastation, Sam finally learns the truth. Not just about her, but about the planet Earth and the entire cosmos surrounding it. What we consider mundane reality, others consider a game . . . and not a very good one. The whole thing is about to be shut down.

Roadway Lighting Design Guide American Association of State Highway and Transportation Officials, 2005 This guide replaces the 1984 publication entitled An Informational Guide for Roadway Lighting. It has been revised and brought up to date to reflect current practices in roadway lighting. The guide provides a general overview of lighting systems from the point of view of the transportation departments and recommends minimum levels of quality. The guide incorporates the illuminance and luminance design methods, but does not include the small target visibility (STV) method.

The Trouble with Cowboys Victoria James, 2019-03-26 "A lovingly written modern-day fairy tale with complex characters and a well-earned, satisfying ending." - Kirkus Reviews From New York Times bestseller Victoria James comes a poignant and heartfelt romance that wraps you in a warm embrace... Eight years ago, Tyler Donnelly left Wishing River, Montana, after a terrible fight with his father and swore he'd never return. But when his father has a stroke, guilt and duty drive him home, and nothing is as he remembers--from the run-down ranch to Lainey Sullivan, who is all grown up now. And darn if he can't seem to stay away. Lainey's late grandma left her two things: the family diner and a deep-seated mistrust of cowboys. So when Tyler quietly rides back into town looking better than hot apple pie, she knows she's in trouble. But she owes his dad everything, and she's determined to show Ty what it means to be part of a small town...and part of a family. Lainey's courage pushes Ty to want to make Wishing River into a home again—together. But one of them is harboring a secret that could change everything. Each book in the Wishing River series is STANDALONE: * The Trouble with Cowboys * Cowboy for Hire * Wishing For A Cowboy * Mail Order Cowboy

Cyanotype Toning Annette Golaz, 2021-09-30 Cyanotype is the most accessible and frequently used of all the alternative photographic processes. When utilized properly, it has the potential to rival other processes when it comes to detail and tonal range, but its Prussian blue color isn't always suitable for the final photograph. Throughout history, cyanotype prints have been toned not only with various—and at times hazardous—chemicals but also with more natural ingredients like tea and coffee. Since the cyanotype itself is non-toxic, Cyanotype Toning will champion an innovative process, developed by the author, of toning cyanotypes with natural material. This process, which is easy and reliable, offers a much broader range of possible colors and even beautiful black and whites. Even duotone or tricolor prints can be attained. The book consists of two parts. Part One is a step-by-step how-to section including all the information that a student at any level needs to achieve a successfully toned print. Easy-to-understand background information is provided on how and why the process works so that readers can venture on their own into the world of natural colors. The first part also has a detailed section on all the factors that can influence the outcome, like paper choice, water quality, properties of the plants, temperature of the bath and the duration of the toning. Part Two is devoted to contemporary artists who have explored toning with botanicals and integrated the process into their creative practice. The book includes: A list of equipment and supplies needed. In depth information about useful plants and the specific properties that make them suitable for toning cyanotypes. Concise step-by-step instructions for printing cyanotypes successfully. A chart of more than 60 tested papers with recommendations on paper choice. Step-by-step generic instructions on toning with botanicals. Troubleshooting toning with botanicals. More detailed recipes for specific colors with information about the plants. Step-by-step instructions on how to print duotone and tricolor prints. A range of creative ideas on how to use the process in classrooms and with different age groups. A comprehensive list of more than 380 tested parts of plants and possible color outcomes. Using botanicals to tone cyanotypes broadens the color spectrum, enlarges creative possibilities and makes the cyanotype process even more versatile. The process is not cut and dried science but a limitless field for discovery and surprises. Cyanotype Toning provides accessible information and instructions for readers at all levels. It is comprehensive and explanatory, so that readers can expand on the subject on their own, as did the contemporary artists who share their experiences and the works they have created using this innovative toning process.

Scout's Outdoor Cookbook Christine Conners, Tim Conners, 2008-05-01 The Scout's Outdoor Cookbook emphasizes the best food preparation and techniques currently used in scouting. Thoroughly covered are recipes employing time-tested cooking methods using Dutch ovens, pots and pans, grills, and open fire. Many outstanding no-cook dishes are also provided. Enjoy over three hundred favorite recipes of leaders from the Boy Scouts of America and the Girl Scouts of the USA, such as: Flying Pigs in Sleeping Bags, Buckeye Biscuits and Gravy, Scoutcraft Meatloaf, Worm Burgers, Johnny Appleseed Pork Chops, Black Swamp Pasta, Oooey Gooey Extwa Toowy Bwownies, Black Bart's Salmagundi, Chicken and Varmints, Teenage

Sugar Addict Orange Rolls, Barracuda Stroganoff, Jeepers Creepers Dirt Parfait, the World's Largest S'mores, and hundreds more! Sometimes wacky, always practical, this book will help the new camp cookie to develop a thorough foundation of basic skills, while providing the experienced chef with plenty of new recipes and techniques to add additional dimension and enjoyment to their outdoor cooking.

LED Lighting for Urban Agriculture Toyoki Kozai, Kazuhiro Fujiwara, Erik S. Runkle, 2016-11-08 This book focuses on light-emitting diode (LED) lighting, mainly for the commercial production of horticultural crops in plant factories and greenhouses with controlled environments, giving special attention to: 1) plant growth and development as affected by the light environment; and 2) business and technological opportunities and challenges with regard to LEDs. The book contains more than 30 chapters grouped into seven parts: 1) overview of controlled-environment agriculture and its significance; 2) the effects of ambient light on plant growth and development; 3) optical and physiological characteristics of plant leaves and canopies; 4) greenhouse crop production with supplemental LED lighting; 5) effects of light quality on plant physiology and morphology; 6) current status of commercial plant factories under LED lighting; and 7) basics of LEDs and LED lighting for plant cultivation. LED lighting for urban agriculture in the forthcoming decades will not be just an advanced form of current urban agriculture. It will be largely based on two fields: One is a new paradigm and rapidly advancing concepts, global technologies for LEDs, information and communication technology, renewable energy, and related expertise and their methodologies; the other is basic science and technology that should not change for the next several decades. Consideration should be given now to future urban agriculture based on those two fields. The tremendous potentials of LED lighting for urban agriculture are stimulating many people in various fields including researchers, businesspeople, policy makers, educators, students, community developers, architects, designers, and entrepreneurs. Readers of this book will understand the principle, concept, design, operation, social roles, pros and cons, costs and benefits of LED lighting for urban agriculture, and its possibilities and challenges for solving local as well as global agricultural, environmental, and social issues.

Next-Generation Greenhouses for Food Security Redmond R. Shamshiri, 2021-06-16 Modern greenhouse technology has revolutionized the food supply chain scenario over the past 40 years. Closed-field cultivation by means of agri-cubes, plant factories, vertical farming structures, and roof-top solar greenhouses has become the backbone of sustainable agriculture for producing all-year-round fresh fruits and vegetables. This book is an attempt to explore several profound questions such as how digital technology and simulation models have saved energy in commercial greenhouses, and why growers prefer LPWAN sensors and IoT monitoring devices over the traditional timer-based controllers? How artificial intelligence is capable of performing microclimate prediction and control, and what considerations should be taken into account for implementing desiccant evaporative cooling systems? With case-study examples and field experiments, each chapter highlights some of the most recent solutions and adaptation strategies toward improving the efficiency and sustainability of closed-field crop

production systems.

National Electrical Code 2011 National Fire Protection Association, 2010 Safe, efficient, code-compliant electrical installations are made simple with the latest publication of this widely popular resource. Like its highly successful previous editions, the National Electrical Code? 2011 LOOSE LEAF combines solid, thorough, research-based content with the tools you need to build an in-depth understanding of the most important topics. It provides the full text of the updated Code regulations alongside expert commentary from code specialists, offering code rationale, clarifications for new and updated rules, and practical, real-world advice on how to apply the code. And in a loose-leaf format, it's easy to customize your experience with the Code by adding job- and situation- specific materials. New to the 2011 edition are articles including first-time Article 399 on Overhead Conductors with over 600 volts, first-time Article 694 on Small Wind Electric Systems, first-time Article 840 on Premises Powered Broadband Communications Systems, and more. This winning combination has created a valuable reference for those in or entering careers in electrical design, installation, inspection, and safety.

Única Looking at the Sea Fernando Contreras Castro, 2017 Fiction. Latino/Latina Studies. Inside the great landfill at Río Azul, Única and her friends, her family, society's cast-offs, struggle to survive on what those in the city throw away. This story of the divers (buzos), the community of Western untouchables who live in landfills and dumps, immediately made Fernando Contreras Castro famous in his native Costa Rica and around Latin America. Now available in English for the first time in Elaine S. Brooks' translation, ÚNICA LOOKING AT THE SEA tells the story of an underclass invisible to the urban bourgeoisie who produce the trash they eke out a living from, a story no less pertinent in the US and the rest of the English-speaking world than it is in Latin America.
