Getting Started with Adafruit FLORA Becky Stern,Tyler Cooper,2015-02-05 This book introduces readers to building wearable electronics projects using Adafruit's tiny FLORA board: at 4.4 grams, and only 1.75 inches in diameter, and featuring Arduino compatibility, it's the most beginner-friendly way to create wearable projects. This book shows you how to plan your wearable circuits, sew with electronics, and write programs that run on the FLORA to control the electronics. The FLORA family includes an assortment of sensors, as well as RGB LEDs that let you add lighting to your wearable projects.

Make ,2014 A whole issue devoted to toys for makers! Toys are big players in the maker world. From educational (STEM/STEAM) to robotics and science, toys provide stimulation, simulation, and prototyping. Make: Volume 41 highlights the latest games and gadgets that have come from the maker community, and provides hands-on inspiration for making your own tech-infused toys.

Cosplay World Brian Ashcraft, Luke Plunkett, 2014 Filled with striking images of costume play from around the world, this definitive look at the global phenomenon known as cosplay examines its evolution from the fringes of society to the spotlight of modern culture. For over 100 years, men and women around the world have been dressing up as their favorite characters from movies, games, comics, TV, and books. Beginning as a curiosity and hobby for social outcasts, it's now a global phenomenon, fuelled by the Internet and an explosion in geek fandom. This in-depth look at the world of cosplay includes interviews with stars like Yaya Han, Crystal Graziano, and Spiral Cats, offers insights into cosplay's history and current landscape, and explains its creative processes, like how Megan Marie built the perfect Wonder Woman costume. *Cosplay World* features over 200 compelling photographs, showcasing everything from campy 1970s costumes to cutting-edge suits engineered in workshops and built using space-age materials. The result is both a celebration of and an informed look at a popular means of self-expression that continues to fascinate.

The Paradigm of Social Interaction Nikolai Genov, 2021-11-25 The monograph *The Paradigm of Social Interaction* presents a paradigmatic synthesis in sociology. This is a reaction to the growing paradigmatic divisions in the discipline and an attempt at fostering the cumulative development of sociological knowledge. The suggested conceptual fusion includes micro-sociological interaction theories, recent theories of organizational interactions and the experience from the study on global trends. The intention is to support the building and explanatory application of middle-range theories in all action spheres and at all micro-, mezzo- and macro-social structural levels. The paradigmatic synthesis is developed around five analytical concepts of the determinants of social interactions: environmental, technological, economic, political and cultural complexes. Another conceptual framework fostering explanations consists of social actors, relations and processes as key parameters of the social interaction paradigm. The book also examines the COVID pandemic as a multidimensional crisis, applying the synthetic paradigm as a heuristic tool and knowledge-organizing framework. It is used in the studies on social innovations, societal transformations and global social trends as well. The book will be of interest to researchers, university teachers and doctoral and master's students in the fields of sociology, social theory, critical sociology, philosophy of social sciences, innovation and societal transformation studies.

How Stella Learned to Talk Christina Hunger, 2021-05-04 INSTANT NEW YORK TIMES BESTSELLER An incredible, revolutionary true story and surprisingly simple guide to teaching your dog to talk from speech-language pathologist Christina Hunger, who has taught her dog, Stella, to communicate using simple paw-sized buttons associated with different words. When speech-language pathologist Christina Hunger first came home with her puppy, Stella, it didn't take long for her to start drawing connections between her job and her new pet. During the day, she worked with toddlers with significant delays in language development and used Augmentative and Alternative Communication (AAC) devices to help them communicate. At night, she wondered: If dogs can understand words we say to them, shouldn't they be able to say words to

us? Can dogs use AAC to communicate with humans? Christina decided to put her theory to the test with Stella and started using a paw-sized button programmed with her voice to say the word “outside” when clicked, whenever she took Stella out of the house. A few years later, Stella now has a bank of more than thirty word buttons, and uses them daily either individually or together to create near-complete sentences. *How Stella Learned to Talk* is part memoir and part how-to guide. It chronicles the journey Christina and Stella have taken together, from the day they met, to the day Stella “spoke” her first word, and the other breakthroughs they’ve had since. It also reveals the techniques Christina used to teach Stella, broken down into simple stages and actionable steps any dog owner can use to start communicating with their pets. Filled with conversations that Stella and Christina have had, as well as the attention to developmental detail that only a speech-language pathologist could know, *How Stella Learned to Talk* will be the indispensable dog book for the new decade.

Ten Principles for Good Design Cees de Jong, Klaus Klemp, Erik Mattie, 2017 Exquisitely produced to reflect Dieter Rams' aesthetic philosophy, this book presents highlights from a forty-year career designing iconic consumer products that enhance our daily lives. For decades, anyone who cared about product design looked to the Braun label when choosing their appliances, radios, and other consumer items. Now Dieter Rams, the guiding force behind the Braun look, breaks down his design principles and processes in this elegant book. Enumerating each of his ten principles such as good design is innovative; good design is aesthetic; good design is useful, etc., this book presents one hundred items that embody these guidelines. Readers will find items that are familiar such as the ubiquitous coffee grinder but also those that are more unusual such as shelving systems and cigarette lighters. A fascinating essay places Dieter Rams in the context of modern design, from Bauhaus to Philip Johnson. Archival materials include photos of Rams' design team and excerpts from his publications and speeches. The book closes with a chronological overview of design icons, categorized by function, that show the enormous breadth of Rams' vision. Taken together, these images and texts offer the most comprehensive overview of Dieter Rams' work to date and will serve as both a reference and an inspiration for anyone interested in how and why good design matters.

Reviving Critical Planning Theory Tore Øivin Sager, 2012-08-21 Discussing some of the most vexing criticism of communicative planning theory (CPT), this book goes on to suggest how theorists and planners can respond to it. Looking at issues of power, politics and ethics in relation to planning, this book is for both critics and advocates of CPT, with lessons for all. With severe criticisms being raised against CPT, the need has arisen to systematically think through what responsibilities planning theorists might have for the end-uses of their theoretical work. Offering inventive proposals for amending the shortcomings of this widely adhered planning method, this book reflects on what communicative planning theorists and practitioners can and should do differently.

Quest to Learn Katie Salen Tekinbas, Robert Torres, Loretta Wolozin, Rebecca Rufo-Tepper, Arana Shapiro, 2010-10-29 The

design for Quest to Learn, an innovative school in New York City that offers a “game-like” approach to learning. Quest to Learn, an innovative school for grades 6 to 12 in New York City, grew out of the idea that gaming and game design offer a promising new paradigm for curriculum and learning. The designers of Quest to Learn developed an approach to learning that draws from what games do best: drop kids into inquiry-based, complex problem spaces that are built to help players understand how they are doing, what they need to work on, and where to go next. Content is not treated as dry information but as a living resource; students are encouraged to interact with the larger world in ways that feel relevant, exciting, and empowering. Quest to Learn opened in the fall of 2009 with 76 sixth graders. In their first semester, these students learned—among other things—to convert fractions into decimals in order to break a piece of code found in a library book; to use atlases and read maps to create a location guide for a reality television series; and to create video tutorials for a hapless group of fictional inventors. This research and development document outlines the learning framework for the school, making the original design available to others in the field. Elements in development include a detailed curriculum map, a budget, and samples of student and teacher handbooks.

3rd Symposium of Ubiquitous Computing and Ambient Intelligence 2008 Juan Manuel Corchado Rodríguez, Dante Tapia, Jose Bravo, 2008-09-16 The Symposium on Ubiquitous Computing and Ambient Intelligence (UCAmI) began as a workshop held in 2003 in San Sebastián (Spain) under the Spanish Artificial Intelligence Conference. This event gathered 32 attendees and 18 papers were presented. The second edition, already as a Symposium, took place in Granada (Spain) under the first Spanish Computer Science Conference (CEDI). Later, in 2006, a second workshop was celebrated in Ciudad Real and, in 2007; the second Symposium was organized in Zaragoza by the CEDI conference. Now we continue to work on the organization of this event in Salamanca, a beautiful Spanish city. The European Community and the Sixth and Seventh Framework Programs encourage researchers to explore the generic scope of the AmI vision. In fact, some researchers have a crucial role in this vision. Emile Aarts from Philips describes Ambient Intelligence as the integration of technology into our environment, so that people can freely and interactively utilize it. This idea agrees with the proposal of Mark Weiser regarding the Ubiquitous Computing paradigm.

How to Be a Digital Revolutionary Violet Blue, 2017-05-31 This is our world, right now: Racist bullies binge on power, science fights to stop the slide into another dark age, women are targets, and the past is forgotten. Under a hostile and cavalier government, protests form online while calls to take action are broadcast on social media. How To Be A Digital Revolutionary illuminates why we're here and what we can do, standing in this moment with devices in hand, as both eyewitnesses and active participants to significant social change. It thoroughly runs down the hazards of taking action to fight injustice and fascism in the digital age, providing readers with a roadmap for effective resistance. How To Be A Digital Revolutionary is woven from clear explainers about murky topics like surveillance and censorship, hands-on strategies to dial

back news overwhelm and rage fatigue, first-person accounts in hacking, practical safety advice for protests, and gritty reporting on rights abuses in the digital realm. Here, you'll learn to identify and minimize your surveillance footprint, about anonymity and making separate identities, how to buy or make a burner phone, and to hack-proof your life. Make your phone less of a tracking device, and keep your communication both secure and private. Find out which documents to keep with you at marches, and how to stay safe if a protest gets violent. Discover ways to support your cause when you can't be there in person. Find groups to join and get rid of poison people. Make a digital protest sign that makes emergency calls if it gets confiscated, choose or make a body camera, and learn how to record, photo, and share under stress. Fight filters and blocks, and defy being censored on social media. Find out how to leak with tools like SecureDrop, and how to create posts and memes that matter. In a time of rampant injustices, *How To Be A Digital Revolutionary* offers a powerful new handbook for the resistance, and a way forward for change no matter your level of technical acumen. Praise for Violet Blue: One of the leading figures in tech writing in the world. --Guardian UK Praise for *The Smart Girl's Guide to Privacy* by Violet Blue: An illuminating handbook for women. --ELLE Magazine *The Smart Girl's Guide to Privacy* is a straight-forward how-to for protecting your privacy and undermining the social media settings that want you to share potentially intimate details with the world. --Bitch Magazine For girls and women in the technological age, this guide to Internet safety is a must-read. It's a young woman's invaluable guide to empowerment, addressing not only the why of keeping strong boundaries but the how. --

Foreword Reviews

Beginning Arduino Michael McRoberts, 2011-07-29 In *Beginning Arduino*, you will learn all about the popular Arduino microcontroller by working your way through an amazing set of 50 cool projects. You'll progress from a complete beginner regarding Arduino programming and electronics knowledge to intermediate skills and the confidence to create your own amazing Arduino projects. Absolutely no experience in programming or electronics required! Rather than requiring you to wade through pages of theory before you start making things, this book has a hands-on approach. You will dive into making projects right from the start, learning how to use various electronic components and how to program the Arduino to control or communicate with those components. Each project is designed to build upon the knowledge learned in earlier projects and to further your knowledge in programming as well as skills with electronics. By the end of the book you will be able create your own projects confidently and with creativity. Please note: the print version of this title is black & white; the eBook is full color. Presented in a clear and engaging manner, this collection of sports trivia will give fans of ice hockey a new and entertaining set of random facts to liven up a boring day or fill the time during intermission.

Radio Girl David Dufty, 2020-04-28 All around Australia, former WRANs and navy men regard the woman they know as Mrs Mac with a level of reverence usually reserved for saints. Yet today no-one has any idea of who she was and how she rescued Australia's communication systems in World War II. Winner, Best 2020 Non-fiction, ACT Notable Awards As you climbed the rickety stairs of an old woolshed at Sydney harbour in 1944, you would hear the thrum of clicks and buzzes. Rows of men and women in uniforms and headsets would be tapping away vigorously at small machines, under the careful watch of their young female trainers. Presiding over the cacophony was a tiny woman, known to everyone as 'Mrs Mac', one of Australia's wartime legends. A smart girl from a poor mining town who loved to play with her father's tools, Violet McKenzie became an electrical engineer, a pioneer of radio and a successful businesswoman. As the clouds of war gathered in the 1930s, she defied convention and trained young women in Morse code, foreseeing that their services would soon be sorely needed. Always a champion of women, she was instrumental in getting Australian women into the armed forces. Mrs Mac was adored by the thousands of young women and men she trained, and came to be respected by the defence forces and the public too for her vision and contribution to the war effort. David Dufty brings her story to life in this heartwarming and captivating biography. '[An] incredible and inspiring life... Dufty's new biography captures her unwavering dedication in the face of adversity.' - Professor Genevieve Bell, Australian National University 'A cracking story about the famous Australian radio engineer you've never heard of.' - Dick Smith, entrepreneur and philanthropist

General Relativity and Gravitational Physics Giampiero Esposito, 2005-03-29 All papers were peer reviewed. Research advances in gravitation and general relativity are discussed, ranging from classical to quantum theories of gravity. Relativistic theories have become the basic model for new research fields encompassing important experiments and

observations which represent a frontier on which Einstein's theory of gravity can be tested. This will provide some new insight into the field of gravitational physics. The proceedings will be a valuable source for advanced graduate students and research workers at all levels.
