Catalysis for Fine Chemicals Werner Bonrath, Jonathan Medlock, Marc-André Müller, Jan Schütz, 2021-08-02 A wide range of chemical products (especially fine chemicals) are important for a healthy and enjoyable modern life; therefore efficient syntheses of these materials are essential. Traditional stoichiometric processes need to be replaced by modern catalytical methods in the change to sustainable chemistry and the production of lower amounts of waste. This book summarizes the wide variety of catalytic methods that have been developed and applied on an industrial scale in recent years to fulfill this goal. The synthesis of compound classes such as pharmaceuticals, agrochemicals, flavoring, and fragrance compounds as well as food additives such as vitamins exemplify the use of these modern catalytic methods in the modern chemical industry.

Maya Worldviews at Conquest Leslie G. Cecil, Timothy W. Pugh, 2009-08-31 *Maya Worldviews at Conquest* examines Maya culture and social life just prior to contact and the effect the subsequent Spanish conquest, as well as contact with other Mesoamerican cultures, had on the Maya worldview. Focusing on the Postclassic and Colonial periods, *Maya Worldviews at Conquest* provides a regional investigation of archaeological and epigraphic evidence of Maya ideology, landscape, historical consciousness, ritual practices, and religious symbolism before and during the Spanish conquest. Through careful investigation, the volume focuses on the impact of conversion, hybridization, resistance, and revitalization on the Mayans' understanding of their world and their place in it. The volume also addresses the issue of anthropologists unconsciously projecting their modern worldviews on the culture under investigation. Thus, the book critically defines and strengthens the use of worldviews in the scholarly literature regardless of the culture studied, making it of value not only to Maya scholars but also to those interested in the anthropologist's projection of worldview on other cultures in general.

Perspectives on Feminist Political Thought in European History Tjitske Akkerman, Siep Stuurman, 2013-06-17 Spanning six centuries of political thought in European history, this book puts the ideas of thinkers from Christine de Pizan to Simone de Beauvoir in the broader contexts of their time. This intriguing collection of essays shows that feminism is not a variant of modern radical discourse but a mode of analysing the issues of authority, power and virtue that have been at the heart of European political thought from the middle ages.
