Advanced Functional Materials Biplab Sanyal, 2012-10-03 This book deals with functional materials that are in the frontiers of current materials science and technology research, development and manufacture. The first of its kind, it deals with three classes of materials, (1) magnetic semiconductors, (2) multiferroics, and (3) graphene. Because of the wide popularity of these materials there is a strong need for a book about these materials for graduate students, new researchers in science and technology, as well as experienced scientists and technologists, technology based companies and government institutes for science and technology. The book will provide this broad audience with both theoretical and experimental understanding to help in technological advances in the development of devices and related new technologies based on these very interesting and novel materials. Covers both the theoretical and experimental aspects of advanced functional materials, which are important for use in a number of rapidly developing novel technological devices Includes excellent coverage of three of the leading advanced functional materials Edited by a leading expert at the forefront of advanced functional materials research

Handbook of Enology, Volume 2 Pascal Ribéreau-Gayon, Yves Glories, Alain Maujean, Denis Dubourdieu, 2006-05-01 The Handbook of Enology Volume 2: The Chemistry of Wine Stabilization and Treatments uniquely combines chemical theory with the descriptions of day-to-day work in the latter stages of winemaking from clarification and stabilization treatments to ageing processes in vats and barrels. The expert authors discuss: Compounds in wine, such as organic acids, carbohydrates, and alcohol. Stabilization and treatments The chemical processes taking effect in bottled wine The information provided helps to achieve better results in winemaking, providing an authoritative and complete reference manual for both the winemaker and the student.
