**Theory of Rotating Stars. (PSA-1), Volume 1** Jean-Louis Tassoul, 2015-03-08 Ever since the first observations of sunspots in the early seventeenth century, stellar rotation has been a major topic in astronomy and astrophysics. Jean-Louis Tassoul synthesizes a large number of theoretical investigations on rotating stars. Drawing upon his own research, Professor Tassoul also carefully critiques various competing ideas. In the first three chapters, the author provides a short historical sketch of stellar rotation, the main observational data on the Sun and other stars on which the subsequent theory is based, and the basic Newtonian hydrodynamics used to study rotating stars. Following a discussion of some general mechanical properties of stars in a state of permanent rotation, he reviews the main techniques for determining the structure of a rotating star and its stability with respect to infinitesimal disturbances. Since the actual distribution of angular momentum within stars is still unknown, Professor Tassoul considers various models of angular momentum as well as of meridional circulation. He devotes the rest of his study to the problems concerning various groups of stars and stages in stellar evolution. Originally published in 1979. Trade Liberalisation and Economic Development in Africa Gift Mugano, 2021-09-30 This book provides a thorough and rigorous discussion on the impact of trade liberalisation on economic development with a special focus on the African continent. The author presents the rationale for trade liberalisation, trade liberalisation frameworks, the trade liberalisation economic development nexus, impediments to trade, and contemporary issues of international trade. In this book, notwithstanding the benefits from trade liberalisation, the author shows that African trade as a share of global trade has remained flat at 3% as in 1975, while the continent's exports have remained raw materials and its intra-regional trade at less

than 15% of total trade, which is the lowest in the world (UNCTAD, 2020). With respect to key economic development indicators such as economic growth, poverty levels, and employment levels, this book shows that, ironically and in direct contrast with the conventional views that trade liberalisation alleviates poverty, trade liberalisation in Africa has resulted in high levels of unemployment and low economic growth which ultimately lead to increased poverty. In addition, this book provides a detailed analysis of why trade liberalisation has failed to yield meaningful benefits to Africa. The binding constraints and blockages which prevent positive spin-offs on trade liberalisation in Africa are discussed in detail in this book. In the same vein, the author provides practical strategies which must be adopted by African countries in order to gain from trade liberalisation, making this work a must-read for African governments, academia, trade experts, regional trading blocs, the World Trade Organization, and development partners. In view of this, and as part of the disruptive and structural transformation policies, the author discusses case studies and international experience contextualised to Africa as well as strategies for addressing the trade-related infrastructure gap, production capacities, export promotion, and aid for trade.

**Regional Trade Agreements and the Multilateral Trading System** Rohini Acharya, 2016-09-22 This book explores bilateral and regional trade agreements, and examines how they are changing international trade rules. It offers an important contribution to the current debate on the role of the WTO in regulating international trade and how WTO rules relate to new rules being developed by regional trade agreements.

*Trade in Goods* Petros C. Mavroidis, 2012-07-19 This new edition of *Trade in Goods* is an authoritative work on international trade by one of the most influential scholars in the field. It provides a comprehensive and detailed analysis of every WTO agreement dealing with trade in goods. The focus of the book is on the reasoning behind the various WTO agreements and their provisions, and the manner in which they have been understood in practice. It introduces both the historic as well as the economic rationale for the emergence of the multilateral trading system, before dealing with WTO practice in all areas involving trade in goods. It contests the claim that the international trade agreements themselves represent 'incomplete contracts', realized through interpretation by the WTO and other judicial bodies. The book comprehensively analyses the WTO's case law, and it argues that a more rigorous theoretical approach is needed to ensure a greater coherence in the interpretation of the core provisions regulating trade in goods. This second edition readdresses and moves beyond the discussion of the GATT presented in the first edition to assess in significant detail every trade in goods agreement at the WTO, both multilateral as well as plurilateral. The book is written to be accessible to those new to the field, with an authoritative level of detail and analysis that makes it essential reading for lawyers and economists alike.
